EXPERIENCE

AI/ML Engineer Intern

October 2025 - January 2026

[Globiz Technology](#)

Ludhiana, India

- Developed and deployed **end-to-end machine learning pipelines** including preprocessing, training, evaluation, and inference using Python, improving performance and scalability.
- Built and optimized **deep learning and NLP models** (transformer-based) for real-world use cases, enhancing accuracy and handling unstructured data.
- Designed and implemented **MLOps workflows** using MLflow and Docker for experiment tracking, model versioning, and deployment, ensuring reproducibility.
- Integrated **GenAI-based solutions (RAG / LLM applications)** with data ingestion and feature pipelines using PySpark and SQL to enable intelligent applications.

Data Science Intern

January 2025 - March 2025

[Wayspire](#)

Gurugram, India

- Designed and implemented **data ingestion and ETL/ELT pipelines** using Python, SQL, and Azure Data services to process structured and semi-structured data into analytics-ready datasets.
- Built and optimized **data pipelines and transformations** using SQL and MongoDB, ensuring data quality, validation, and efficient storage for analytics and ML use cases.
- Performed **exploratory data analysis (EDA)** and developed machine learning models, including preprocessing, feature selection, and evaluation for predictive insights.
- Developed **interactive dashboards and reports** using Power BI, leveraging Azure-based data architecture to improve query performance and business decision-making.

ACHIEVEMENTS

- Solved **250+ DSA problems and SQL problems** across complex joins, window functions, aggregations, and query optimization, enhancing analytical thinking and data processing efficiency.
- Built **10+ AI/ML projects** implementing end-to-end pipelines including data preprocessing, feature engineering, model training, and deployment with optimized data workflows.

TECHNICAL SKILLS

- Programming:** Python, SQL, C++, Java, R
- Machine Learning & AI:** Scikit-learn, TensorFlow/PyTorch, NLP, Deep Learning, Feature Engineering, Model Evaluation, Model Training, Data Cleaning
- MLOps & GenAI:** MLflow, Docker, CI/CD, LangChain, RAG, LLM Applications
- Databases:** MySQL, PostgreSQL, MongoDB
- Data Engineering:** PySpark, Spark SQL, Databricks, Azure Data Factory, Azure Data Lake, Delta Lake, ETL/ELT Pipelines, Data Warehousing, Data Modeling
- Visualization & Tools:** Power BI, Tableau, Looker Studio, Excel
- Others:** Git, GitHub, Linux, Postman, Jupyter, VS Code, Anaconda, Google Colab

EDUCATION

B.Tech. (CSE) - 8.14 CGPA

GNA University

2022 - Present

Phagwara, Punjab

Higher Secondary - 75.8%

GSSS MultiPurpose

2022

Ludhiana, Punjab

PROJECTS

[US Visa Approval Prediction System \(Production MLOps Pipeline\)](#)

Python | Scikit-learn | MLflow | MongoDB | Evidently AI | Docker | AWS ECR | AWS EC2 | CI/CD

- Designed an end-to-end **scalable machine learning pipeline** including ingestion, validation, transformation, training, and prediction using modular architecture.
- Implemented robust **data validation and data drift detection** using Evidently AI, ensuring high data quality and continuous monitoring of model performance in production.
- Integrated **MLflow for experiment tracking, model versioning, and reproducibility**, enabling efficient model lifecycle and pipeline management.
- Containerized the application using **Docker** and deployed on AWS using **ECR, EC2, and GitHub Actions CI/CD**, enabling automated, reliable build and production deployment.

[End-to-End Machine Learning Pipeline with Modular Architecture](#)

Python | Machine Learning | Deep Learning | Data Visualization | Data Cleaning | Azure | Modular Architecture

- Built an end-to-end **machine learning system** with modular architecture, including data ingestion, transformation, model training, and prediction pipelines.
- Performed **EDA and data preprocessing** (missing values, encoding, scaling) using Pandas and Scikit-learn pipelines to prepare high-quality training data.
- Implemented **feature engineering and model training** including traditional ML models and basic deep learning approaches, with hyperparameter tuning to improve performance.
- Developed a **prediction pipeline and deployed web application** using Flask and **Azure services**, enabling real-time inference and user interaction.

[Intelligent Document Assistant using RAG](#)

GenAI | FASTAPI | Python | LangChain | LLM | RAG | FAISS | Azure Data Lake | PySpark | FastAPI | NLP

- Built a **Retrieval-Augmented Generation (RAG) pipeline** using LLMs and LangChain to enable question-answering over custom documents (PDFs, structured data).
- Designed **data ingestion and preprocessing pipelines** using PySpark and Azure Data Lake, including document chunking, embedding generation, and storage in vector databases.
- Implemented **semantic search and context retrieval** to enhance response accuracy, combining NLP techniques with vector similarity search.
- Developed and deployed a **GenAI-powered API** using FastAPI, enabling real-time query handling and scalable integration with downstream applications.
